Knowledge – Experience - Creativity

Sustainable Technology Solutions

NEW DEVELOPMENT, RENOVATION, RESTORATION and ADAPTIVE REUSE

Since 1998, NTI has been planning for technology, estimating budgets, designing the infrastructure, creating drawings, and managing the implementation of technology systems for IT, AV, Security and Wireless Systems. As a result of NTI's dedication to "Planning Before Building", our clients receive sustainable technology solutions at the lowest total cost of ownership.

NETWORK TECHNOLOGIES, INC. (NTI) PROFILE

NTI Milestones:

- 1998 – Jeff Cook and partners founded Network Technologies, Inc.
- 2001 - Added Network Implementation and Commissioning services
- 2002 - Added Project Management services
- 2006 - Created NTI Audio Visual and Control Systems division
- 2008 – Began publishing the Technology Planning & Design newsletter
- 2010 – Secured 600th project*

SERVICES

Programming Services – Serving as the owner's advocate to properly scope desired technology systems including anticipated pricing

Planning & Design – Planning and design of the technology infrastructure for data/voice, security, MATV/CATV cabling, Security, Audio Visual and Control Systems

Due Diligence – Evaluation of existing physical location, plans or design as the owner's advocate

RIMS Professional Services - (RFP Implementation Management Services)
Specification and management of the procurement of required technology systems as the owners' "eyes and ears" with regard to the technology systems purchase and installation

Project Management – Management of the technology implementation process beginning with the development of construction documents for all technology disciplines

Commissioning – Review of the technology systems to ascertain that all systems have been installed properly and are working correctly

SYSTEMS

Data/Voice & Special Systems Cabling Design from the layout of the Equipment Room to all outlet details including construction documents for hardwired and wireless systems

AV Systems Design based on client direction to achieve defined objectives, including construction documents, and recommendations for specific solutions and providers

Security Systems Design specific to the project's defined objective, including intrusion detection and CCTV

MATV/CATV Cabling System Design including required junction boxes, TV locations, splitters, taps and amplifiers

DAS – Distributed Antennae Systems evaluation, planning, design and implementation management to verify cellular coverage.

Control Systems which can increase the efficiency of the building or campus by consolidating control of the technology systems to reduce overall energy consumption

CORPORATE

NTI has engaged in over 100 corporate projects with names you may know including new facilities, relocations, expansions, data and training facilities.

Ford & Harrison – Multiple Locations

When Ford & Harrison moved to a new facility or built one in Atlanta, Dallas, Memphis, Miami, Phoenix, Savannah and Spartanburg, they relied on NTI to design/build the cabling infrastructure and manage the project including acquisition and configuration of networking equipment.

EarthLink – Atlanta, GA

NTI performed a survey of existing data centers and prospective data center sites, designed the data center layout, cable management, and structured cabling systems for multiple office locations. We also assisted EarthLink in developing IT infrastructure standards for their data centers.
